

Versalite® Cups

A product **new** in your recycle stream

Versalite is our line of durable and recyclable polypropylene (PP) drink cups designed for thermal applications. Versalite cups were tested in several material recovery facilities and with **KW Plastics**, the world's largest plastics recycler for HDPE and PP, to ensure they can be recycled in mixed polypropylene streams, and converted into quality recycled PP resin.

*In the existing PP recycling stream

Ways to Identify Versalite Cups

#5 PP symbol on the bottom of the cup

Rolled rim and seam on cup

Let your optical sorters do the work
