

### Features and Benefits

- A widely recyclable #5 plastic polypropylene (PP) based to-go cup\* that can be used for hot and cold beverages
- Made from PP, a common plastic used across many markets including food packaging, healthcare products, and other consumer sectors
- Insulation performance similar to EPS foam means comfortable hands for consumers and eliminating the need for a sleeve results in fewer SKUs for you to manage
- Provides superior durability—able to stand up to your operations and distribution networks, while giving customers the ability to microwave or wash in the top-rack of their dishwasher
- Offers operational efficiencies in stores and in transit that may help cut your carbon footprint
- High-resolution artwork capabilities that may help improve brand equity and consumer recognition
